

ADAM CLEMENTS SAFARIS | TANZANIA

ABOUT US ...

As one of man's oldest traditions, hunting is not only a passion, but a way of life. For those of us who choose the hunting life, there is a piece of our soul that beckons us to take to the woods, to the bush, to the water, or to the mountains and reconnect with the ways of old. We respect the wildlife that we pursue.

At Adam Clements Safari Trackers, we understand this need, because we feel the call as well. We strive to give our clients an adventure and memories to last a lifetime, and hunting stories that can be passed around the campfire for future generations. Whether you want that big black-mane lion, 200+ inch Mule Deer, or a trophy big-horn sheep, we have a hunt for everyone. With a devotion to customer service and knowledge in the industry, we will help you plan from beginning to end.

I was born and raised in Tanzania, East Africa to missionary parents who dedicated their lives for 42 years. I grew up on the shores of Lake Victoria right next to the famous Serengeti National Park as my back yard. I grew up hunting as early as I can remember and that passion for wildlife has never faded to this day. I did a lot of animal control hunting for the government for Hippo, Lion, and Leopard at an early age along with a lot of Buffalo hunting.

At the age of 19 I went to the University of Tennessee and got my BS degree. During my University years, I worked for the police department and ended up working as undercover narcotics for the government after that. After several shootings and being shot at, being stabbed, and receiving the purple heart from the government, I decided that I would pursue my real passion of hunting. So, in 1994 I started Adam Clements Safari Trackers and gradually grew my company one client at a time into the successful company it is today

Adam, Sarah, and Fairyn Clements

I have to date taken with clients 130 Leopards and 89 Lions and known by many of my clients as the cat man! I can only say thanks to my loyal clients and to those of you who have hunted with me in the past and present, for without your trust in me, I would not be where I am today!

I am very blessed to have met and married my beautiful and smart wife Sarah who is a Pharmacist and who also handles my accounting. We have a beautiful daughter Fairyn who is just as smart as her mother and loves the outdoors and being in Africa. We as a family strive to give you our very best when you book your adventure with us and I can assure you that my experience and knowledge of this industry will save you time and money.

When you embark on a journey to Africa for a Hunting or Photographic Safari, you are going because you want to embrace a new adventure by experiencing things you are unable to view anywhere else. We strive to ensure a successful Safari full of memorable experiences created by our knowledgeable team of professionals. It is not only the adventure that creates a successful Safari, it is the people you are surrounded with, their culture, the smells of the African wilderness, being awakened at dusk by the chirping of the Birds, the roar of the Lion at night, the tastes of different foods or being so close to a Leopard that you can almost feel its breath on you. These are just a few of the memories that we would create for you, your family and friends. It is not just a Hunt or Photographic Safari being offered but an unforgettable adventure and experience.

To all of the clients who booked and hunted with us this year, I'd like to thank you for allowing myself and our entire team the opportunity to create a memorable experience. I hope that your Safari was above and beyond your expectations as I personally strive to offer nothing less than the very best experience for each client. We have had another outstanding year with some of the most beautiful trophies taken. Our brochure speaks for itself with many satisfied clients. We have taken them on a journey, and the images are just a mere reflection of the life long memories that turned their dreams into reality. I would like to personally thank all of our Professional Hunters and Outfitters that I work with for doing an outstanding job, as always. To my office staff, a tremendous amount of gratitude for a great year in assisting each and every client. Of course many thanks to our clients, as we owe our success to them!

When you book a Safari with Adam Clements Safari Trackers, you can be assured that you are booking a top quality Safari. I only deal with the very best Outfitters and areas, personally spending my own time and money visiting each to ensure that my clients will be taken care of. For those of you who have not booked a Hunting, or Photographic Safari with us, I hope that you will give us a call and allow us to turn your dreams into a reality, creating treasured lifelong memories for you, your family, and friends.

David & Crystal Watts: Our biggest partners in our mission for conservation.

IF YOU ONLY VISIT TWO CONTINENTS IN YOUR LIFETIME, VISIT AFRICA TWICE.

TANZANIA

Adam Clements Safaris Limited is our actual operating company within Tanzania. The government concessions that we offer in Tanzania are all managed and operated with our own camps, staff, vehicles, and supplies. We have our own big office located in Arusha to handle all operations and trophy exports.

Tanzania is a land that has lured famous explorers and adventurers for centuries. Tanzania to this day still lures adventurers and sportsmen from around the world. It is one of the last remaining countries in Africa where you can still experience the true East African adventure. Whether it be hunting for the big cats, big buffalo, and special plains game, sightseeing and photography, or climbing Mount Kilimanjaro, Tanzania has everything. If you truly want an adventure and experience that is unmatched, then Tanzania is the country of choice. Apart from hunting or sightseeing, the most important aspect of your safari should be the unforgettable memories of the unique atmosphere of the African bush along with the people, animals, skills, sights, smells and sounds that you encounter while in Tanzania.

Books have been written and movies filmed, attempting to describe the impassioned grip Africa can have on the soul. From the days when hundreds of porters would carry supplies for months-on-end expeditions, to today, when the most remote places are accessible by light aircraft, there is an adventure and romance associated with a safari in the African wilderness.

For some, such as Adam Clements Safaris, that adventure has become a way of life. Whether you seek a luxurious wildlife adventure, a remote and rugged area, a family holiday, or if you are a photographer with a mission, we will help you organize your journey.

We have excellent areas and camps. Whether you're in Northern Tanzania on the Masai plains, or in Western Tanzania, you will have an experience that will bring your dreams to reality and memories to last a lifetime. In Tanzania, the areas we have are all PRIME areas where you can be assured of quality trophies, first-class camps, equipment, and our personal attention.

CAMP AND FOOD

Our camps and food are extremely important, so we make sure that our camps are quality, our food is delicious, and our service is first class.

SCI PROFESSIONAL HUNTER OF THE YEAR 2021

I am not one for awards and was not going to mention this in the brochure, but then I felt that I should be proud to honor the people who really deserve this award. My trustworthy and loyal trackers! So, this award and honor goes to my trackers, who are always by my side day in and day out, and who make my job easier, and who help make each safari a success.

My main tracker is DOTO. He has been with me since we were five years old, and we grew up together. He has been on every hunt I have done in my life. We could write a book together and have some great stories to tell. Doto is a perfectionist when tracking, great at judging animals, very detailed, and does not give up. He loves cat hunting and usually always has a smile on his face. He loves clients who bring candy with them, and he loves sharp knives.

My second tracker is FREDDY. He is my newest addition and has been with me for ten years, and he is Mr. Eagle eyes. I started him off from scratch, and Doto and my other tracker Mamadi trained him. He has grown into an exceptional tracker and a great addition to my team. Freddy can spot animals that only you and I can see with binoculars a mile away! He is also always laughing and has a great attitude, making a fantastic team with great attitudes and great energy.

I also have to mention my driver HARUBU who is crucial to our team. The team does not operate without all the players! Harubu has been my hunting driver for 20 years now! He is an exceptional mechanic and is the one who makes sure everything is ready on the hunting car. He ensures it's clean and our lunch boxes are packed every day. He also makes sure all my equipment is there and hands me what I need when I need it.

So, this award is an honor in that my team deserves recognition for all they do and have done over the years, and I thank them for their hard work and dedication of 18 hour days; and I present this award to them and will put it in camp.

MOYOWOSI SCENERY

MALAGARASI RIVER FISHING

Our Malagarasi River in the Moyowosi Game Reserve is wildest most remote and best fishery there is for Tiger fishing in my opinion. We have 200 km of river that you will fish during your 6 day trip. Set deep in an untouched corner of Western Tanzanian wilderness. This area is home to monster 20-pound-plus tigers. Nobody else can offer you 200 km of private remote fishing all to yourself where you fish all 200 km! A trip to Tanzania, Africa is without a doubt a journey to the wildest edge of fly fishing, and with our guide one of the most experienced guides in the entire region. The Malagarasi River is the finest, wildest, and most productive African tiger fisheries hands-down that Africa has to offer. If you want to experience a fun wild and remote fishing destination where you catch big Tiger Fish and get to see beautiful bird life and experience an adventure fly camping in remote Africa, then this is the place. We promise you that there is nothing like it in the world!

ADAM CLEMENTS SAFARIS: *ANTI-POACHING & MANAGEMENT*

Our Anti-Poaching Units spend 365 days a year in our concessions patrolling. We patrol by vehicle, boat, helicopter, tractor, and foot to ensure we cover land, swamp, and rivers.

For each concession we have 1 Unit that consists of 4 Government game Rangers and 4 company trained staff.

Our presence and effectiveness since we started in these areas has been tremendous. When we first took over these areas, there was very little to no Elephant sign or sightings. Within only a few months to half a year of our strict conservation and anti-poaching the Elephants started to return, to where now we have daily fresh sign and sightings.

The Hippo had been poached out of the Malagarasi River when we started, and now the Hippo have started to return and we are starting to see new life and more abundance of game in the River where there had no been any protection for many years.

These are just a few good success stories, but over all the game is abundant and with our protection we plan to increase the numbers even more

Conservation does not just happen with Anti-poaching and community education. Interaction is very important. We work very closely with our fellow Game department and government with our outlining villages that border our concessions to the West. Trying to educate them on the value of the wildlife and what the wildlife and heritage means to them.

Also, that part of the revenue that we get from the wildlife does go back to them with what we provide to their communities with different projects.

Projects such as schools, food, equipment for hospitals, education and so forth.

OUR MISSION

- Provide proactive assistance to the Tanzanian Government and the people of Tanzania with their efforts to conserve their network of protected areas.
- Engage rural communities in the conservation of their natural heritage and empower them to alleviate some of the conditions that contribute to poverty.
- Monitor, research and facilitate initiatives in sustainable utilization of natural resources.

GOALS AND ACCOMPLISHMENTS

We have been very blessed to have a few very loyal supporters of our mission and goals, which have supported us. Thanks to a handful of loyal clients who have supported us in our dedication and have seen our mission in our areas, we have been able to accomplish so much and grow in our conservation. Last year we purchased a boat to start patrolling our Malagarasi River, where we began a 24/7 Anti-Poaching Unit. Our unit has been a huge success; we have managed to patrol and clean up the entire 200km of river that we control. This river system is now protected. The hippos are coming back, the crocodiles are sunbathing peacefully, the animals are grazing along the banks without being snared, and the birdlife on the river is out of this world. With additional support, we ordered more boats to protect this vital ecosystem so that this paradise can continue to flourish, allowing us to utilize it further for fishing, hunting, and bringing in revenue to support the anti-poaching.

We were also able to conduct Anti-Poaching with a helicopter this year which is the only method to control poaching within our swamp ecosystem. The helicopter addition was a huge success and the only effective way to patrol our massive swamps. Our swamps are home to the rare Sitatunga, Shoebill Stork, and many other species who use the swamp as protection like Elephant, Hippo, Crocodile, Waterbuck, Bushbuck, etc. If we do not stay dedicated to our cause and mission, these animals will be poached. It is very costly to run air patrol, and we thank all those who have hunted with us and those who have directly allowed us to protect the wildlife and areas that we love dearly.
